Whether you in the car, walking the dog, doing the gardening or setting inside your home, you simply press the remote control button and your gate will open and if you like you can have a courtesy light come on while the gate is operating, using the same remote you can also operate your garage door or other devices (Extra receivers available).

Programmable Remote Controls

Whether you in the car, walking the dog, doing the gardening or setting inside your home, you simply press the remote control button and your gate will open and if you like you can have a courtesy light come on while the gate is operating, using the same remote you can also operate your garage door or other devices (Extra receivers available).

The motors are strong, quiet and long lasting, the system is suitable for heavy and light gates up to 500kg and 4.5m wide without a lock or up to 6m with the use of a lock, the gates will slow down at the end of Opening and Closing operation avoiding crashing sounds and there is NO need for physical stops in the ground, once the gate is closed it can't be pushed open by intruders!

Swinging Automatic Openers Gates

The mechanical swing arm is ideal for Double gate operation but also can be used on single gate. All closers include weather proof 12VDC motors with limit switches, folding arm linkages, 12V DC battery, 2 remote controls, computer-

ized special purpose weather proof control panel with self programming, and, the auto gate computerized control panel learns the operating time cycle of each gate and sets itself automatically to slow down at the end of closure and opening!

12 months GUARANTEE on all automatic gate openers!

Sliding Automatic Openers Gates

For gates up to 400Kg! Heavy Duty DC Motor capable of handling heavy gates. Build-in Backup Battery for emergency power failure operation. Security Remote Controls Self-learning type with rolling code safety and 4 buttons for the convenience of operating any three different roller doors or garage doors (matching receivers available to make use of the remaining buttons).

The gate can also be opened fully or half way allowing pedestrians to enter and leave with ease!
